

AUGERS

Kamar Augers are manufactured in various models to accomplish the requirements for every type of ground drilling conditions.

In order to increase the resistance of our augers, special compound steels are used on request.

The Kelly boxes can be manufactured custom sized and shaped for every kind of drilling rigs.

On request, every type of hard-facing & ware protection is available. We can also use special wear protection plates and sheets.

We prefer to use our own well-known branded carbide picks and teeth.

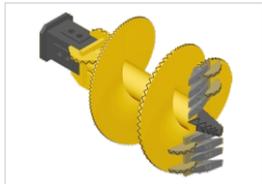

For soil conditions, long attack, high penetration ability special excavation type teeth and tungsten carbide inserts protected teeth options are available as per the requirements.

Features of Augers:

- › Fish tail pilot
- › Collar ring W/km-85H Holder
- › Double cutting edge
- › Flat KM-80 teeth
- › KM 47-22HD Bullets
